(continued on next page)

Just when you thought this year's agenda couldn't get any better – it has!

We are pleased to announce we have added one more session which will be offered on Sunday to anyone serious about implementing an apprenticeship program.

SUNDAY, FEBRUARY 28, 2010

8:30am–12:30pm

Apprenticeship Program 101

Step-by-step guide on what to expect during actual implementation.

This part of the presentation is designed as a how-to guide for companies serious about starting an Apprenticeship program:

- Learn your responsibilities as a Sponsor.
- Understand the Program guidelines as approved by the United States Department of Labor.
- Review of the support you can expect to receive from the Metal Building Institute (MBI).

Train the Trainer Session

A key role of becoming a Sponsor is actually educating your apprentices! Teaching is not a comfortable role for everyone so let us make it easy for you. Participate in an actual course module (Bolting and Aligning) and receive copies of all the teacher notes, tips and techniques.

Class will be offered by Gary T. Smith, President of Thomas Phoenix International, Inc.; Past-President of MBCEA Mid-Atlantic Division; Director of Metal Buildings Institute and Trustee of the MBCEA. Mr. Smith pioneered the Assembler, Pre-engineered Metal Buildings Apprenticeship for our industry. His company has had a successful apprenticeship program for more than 3 years. His passion and leadership were instrumental in the MBI receiving endorsement from the US DOL. His enthusiasm for safety, training and education knows no bounds.

(Schedule is subject to modification.)
