

# METAL BUILDINGS INSTITUTE™

**Dear Sasha,**

The MBI is a non-profit focused on the development of programs, education and training for the benefit of Metal Building Contractor and Erectors.

For more than 14 years, the Metal Buildings Institute has offered the Quality and Craftsmanship Training Series and related testing and results tracking. The series was and remains one of the only training systems designed by metal building erectors for metal building erectors. The Metal Buildings Institute™'s Quality and Craftsmanship Video Series is available in a traditional DVD format and online.

The series debuted at \$1000 and we were frequently told it was worth every penny. Countless Contractors and Erectors have organized their internal training processes and new hire orientations around this one powerful tool. The complete set now retails for \$500 and is discounted to MBCEA members to \$350.

There is no comparable training tool specific to the needs of a metal building erector. Our Apprenticeship program relies on 6000 hours of on-the-job training and 296 of related instruction. A good portion of those "classroom" hours are covered right in this series.

The [www.mbidvd.org](http://www.mbidvd.org) website was designed in conjunction with the Metal Buildings Institute™'s Quality and Craftsmanship Video Series. The site provides the ability for a company to:

- Provide online access to some or all of the 11 video training modules to each of their employees.
- Test each of their employees / students online and provide completion certificates for successful tests.
- Track employee progress for both the online viewing and testing processes.

Use of this premier testing and tracking system has been the same low price since the day the site opened. Due to the rising costs of maintenance, we will be increasing the cost per test to \$10 effective December 15, 2014. Test keys pre-purchased at today's rate will continue to be honored so stock up now and save.

Thank you for your understanding and your continued support. Stay tuned for information in the New Year regarding a much awaited addition to the series, Insulated Metal Panels.

Sincerely,

Tim Seyler  
President, MBI
